بنیان سلامت کسری

Bonyan Salamat Kasra Company (BSK), was established in 2014 as a knowledge-based company with the aim to promote community health.

BSK is mostly engaged in production of multivitamins, minerals, sports and natural weight loss supplements. It is currently producing various supplements and medicinal formulations in different forms of capsule, pill, sachet, drop and oral vial. BSK is located in the Science and Technology Park of Pardis, Tehran province.

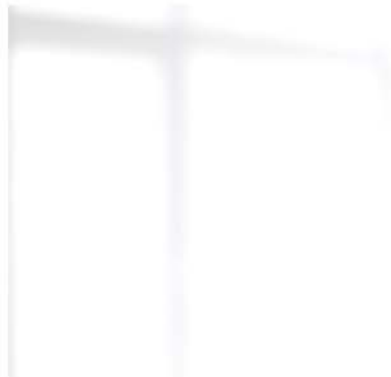

It is highly committed to the domestic manufacturing of products needed by various age groups.

BSK has a state of the art R&D Department and is keeping all of its products in line with the latest scientific research.

BSK has a new manufacturing facility in the Pardis Science and Technology Park in the Pardis city in Tehran for production of supplement and pharmaceutical dosage forms and also the second facility is under construction in the phase III of the park which is supposed to be fully furnished with state of the art machinery for liquid oral dosage forms.

A photograph of a baby with light brown hair and blue eyes, crawling on a reflective surface. The baby is wearing a white diaper and is looking directly at the camera with a curious expression. The background is a plain, light color. A dark grey horizontal band is overlaid across the middle of the image, containing the text "Child Growth & Development" in white.

Child Growth & Development

Liposofer®

Iron supplements has always been associated with some side effects especially in children. In liposomal iron, ions are located in two layers of phospholipid membranes and absorbed intact in the intestine. Iron is more stable in its liposomal form, so its absorption and bioavailability are increased, and due to the lack of direct contact of iron molecules with the gastrointestinal tract, it lacks the common gastrointestinal effects, metallic taste of iron. No staining and blackening of teeth and gums. Liposofer® is produced as 30 ml oral suspension drop containing 7 mg liposomal iron as pyrophosphate salt per ml. It is also gluten free with pleasant and desirable toffee flavor that makes it easy to use.

How to use Indications

- Prevention from iron deficiency anemia in infants and children

Point

- According to physician's order or 7-14 mg (1-2 ml) daily.
- Due to the liposomal form of iron in this product, it does not interfere with other drugs, dairy products and does not blacken gum and teeth.

Liposofer twin®

Liposofer® twin is produced as 2*30 ml oral suspension drop containing 7 mg liposomal iron as pyrophosphate salt per ml. It is also gluten free with pleasant and desirable toffee flavor that makes it easy to use, so it will be cost-effective to buy.

Indications

- Prevention from iron deficiency anemia in infants and children

How to use

- According to physician's order or 7-14 mg (1-2 ml) daily.

Point

- Due to the liposomal form of iron in this product, it does not interfere with other drugs, dairy products and does not blacken gum and teeth.

Liposofer fort®

Liposofer fort® is produced as 30 ml oral suspension drop containing 14 mg liposomal iron as pyrophosphate salt per ml. It is also gluten free with pleasant and desirable toffee flavor that makes it easy to use.

Indications

- Treatment and prevention from iron deficiency anemia in infants and children

How to use

- According to physician's order or 14 mg (1ml) daily.

Point

- Due to the liposomal form of iron in this product, it does not interfere with other drugs, dairy products and does not blacken gum and teeth.

Adzofer®

Daily intake of essential vitamins and minerals is important for better growth and development in children. Vitamins A, vitamin D, zinc and iron are the most important of these essential vitamins and minerals.

Adzofer® is produced as 30 ml oral suspension drop containing 1500 IU vitamin A, 400 IU vitamin D3, 5 mg zinc in gluconate form and 15 mg liposomal iron per ml. it is also gluten free with pleasant toffee flavor.

Indications

- Providing daily needs and preventing from vitamin A, vitamin D, and Zinc deficiency.
- Boosting the immune system
- Prevention from iron deficiency anemia

How to use

- According to physician's order or 1 ml daily.

Point

- Due to the liposomal form of iron in this product, it does not interfere with zinc in Adzofer®, other drugs, dairy products and does not blacken gum and teeth.

Liposofer multi®

Liposofer multi® is produced as 30 ml oral suspension drop containing 10mg liposomal Iron, 1500IU Vitamin A, 400 IU Vitamin D3, 3 IU Vitamin E, 0.5 mg Vitamin B1, 0.5 mg Vitamin B2, 4 mg Vitamin B3, 0.4 mg Vitamin B6, 2 mcg Vitamin B12, 80 mcg Folic Acid per ml with toffee flavor. It is also gluten free.

Indications

- Providing essential vitamins
- Improvement bone growth
- Boosting the immune system
- Prevention from iron deficiency anemia

How to use

- According to physician's order or 1 ml daily.

Point

- Due to the liposomal form of iron in this product, it does not interfere with other drugs, dairy products and does not blacken gum and teeth.

Liposofer multi® syrup

Daily intake of essential vitamins is crucial for the growth and development of children. Vitamins A, D, E, the B-complex group, and liposomal iron are essential nutrients that maintain children's health and enhance immune system. Thanks to the liposomal formulation the side effects of iron which is encapsulated in a liposomal coating is reduced.

Liposofer Multi® syrup is an oral suspension syrup 200 ml with a pineapple flavor. Due to the liposomal iron formulation in this product, its iron does not induce gastrointestinal side effects, black teeth or gum, and interaction with other medications or dairy products. Liposofer Multi® syrup meets the daily vitamin requirement of children, containing B vitamins, vitamin A, D, E, and liposomal iron.

Indications

- Providing essential minerals and vitamins
- Prevention of iron deficiency anemia
- Improvement of bone health
- Enhancing the immune system
- Support for overall body health

How to use

- Children aged 2 to 8 years: 2.5 to 5 ml daily or as directed by your doctor.
- Children over 8 years and adults: 5 ml once or twice a day or as directed by your doctor.

Point

- This product is gluten-free, without artificial color or alcohol.

Lipofolic B12®

Folic acid and vitamin B12 have vital roles in the body and maintain health. Adequate consumption of these vitamins through diet or supplements may help to maintain the overall health of the body and prevent many diseases. The liposomal form of vitamins improves their absorption and effectiveness. Lipofolic B12® is a 30-ml oral drop with a pineapple flavor. Due to liposomal vitamin B12 and folic acid in this product, the absorption and efficacy of this product is higher when compared to conventional formulation. Lipofolic B12® provides the requirement folate and vitamin B12 for body. It contains 200 mcg of Folic acid and 5 mcg of vitamin B12. As a result, it may help to eliminate anemia related to these vitamins deficiency. Also, it plays key role in the development of the nervous system.

Indications

- Providing folate and vitamin B12 needed by the body
- Improving anemia caused by folate and vitamin B12 deficiency
- Ensuring the health of the nervous system and mental development of children

How to use

- Children under 1 year: 0.5 ml daily
- Children over 1 year: 1 to 2 ml daily or as directed by the doctor
- Adults: 2 ml daily or as directed by the doctor

Point

- This product is gluten-free, without artificial color or alcohol.

klevikids®

Long-chain unsaturated fatty acids fall into two main categories: omega-3 and omega-6 fatty acids. Docosahexaenoic acid (DHA), is a long-chain unsaturated omega-3 fatty acid that plays a key role in the development and function of normal nerve structure and its accumulation along with other fatty acids in the brain accelerates brain tissue development in infants.

klevikids® is produced as 30 ml oral drop containing 40 mg DHA, 1500 IU Vitamin A, 600 IU Vitamin D and 10 IU Vitamin E per ml. It is colorless and gluten free with lemon flavor and due to its unique formulation, it has the least amount of fish odor to use for children

Indications

- Providing daily needs and preventing from vitamin A, vitamin D, and vitamin E deficiency
- Evolution of nerve structure and growth of brain tissue
- Affecting visual acuity and retinal function
- Helping to grow bones and teeth
- Maintaining cardiovascular health

How to use

- According to physician's order or 1 ml daily.

Point

-

KiD3 BSK® Drop

Vitamin D is a fat-soluble vitamin that is essential for bone health throughout life. This vitamin increases the absorption of calcium in the intestines and makes the bones stronger. Considering low levels of this vitamin in breastmilk and some food, its deficiency is common in this age group and therefore vitamin D supplements are generally suggested for them. KiD3 BSK® is produced as 15 ml oral drop containing 400 IU vitamin D3 per ml. it is gluten free with no smell, taste and artificial colour.

Indications

- Providing daily needs of vitamin D3 and preventing its deficiency in infants and children
- Improvement of calcium and phosphorus absorption
- Maintaining function of normal immune system and muscle activity

How to use

- According to physician's order or 1 ml daily.

Point

-

KiD3 fort®

Severe deficiency of vitamin D3 in the body will lead to lack of calcium and phosphorus absorption. Also, calcium supplements will not be effective for treating osteoporosis in the absence of vitamin D. Severe deficiency of vitamin D3 leads to rickets in children and causes osteomalacia, increased risk of bone fractures and osteoporosis in adults.

Kid3 Fort® is produced as 15 ml oral drop containing a significant amount of 12000 IU vitamin D3 per ml. It is also gluten free with no smell, taste and artificial colour.

Indications

- Prevention and treatment of rickets, bone deformity and osteoporosis
- Maintenance function of normal immune system and muscle activity
- Increasing bone mineral density and thus prevention of osteoporosis in the elderly

How to use

- According to physician's order.

Point

- This product contains a high dose of vitamin D3 and be careful while using it.

AD3 bsk®

Vitamin D is a fat-soluble that is essential for bone health throughout life. This vitamin increases the absorption of calcium in the intestines and makes the bone stronger. One of the other fat-soluble vitamins, is Vitamin A which is important to boost the immune and vision system.

AD3 bsk® is produced as 5 ml oral drop containing a significant amount of 300 IU vitamin D3 and 600 IU per drop. It is also gluten free with no smell, taste and artificial colour.

Indications

- Providing daily needs of vitamin D3 and vitamin A
- Improvement of calcium and phosphorus absorption
- Maintaining function of normal immune system and muscle activity
- Increasing bone mineral density
- Helps the growth and development of children

How to use

- According to physician's order or 2 drops daily.

Point

KID3 bsk® Dropper

Vitamin D plays a crucial role in children's health and development. It is naturally synthesized in the skin through sun exposure, but factors like limited sun exposure and the low vitamin D content in breast milk increase the risk of deficiency, especially during periods of rapid growth. Adequate vitamin D levels are essential for calcium absorption in the intestines, which supports strong bones and overall development. KID3 BSK® is a high-quality pediatric oral drop designed to meet the daily vitamin D needs of children. Its convenient 5-ml dropper bottle ensures precise dosing, making it easy and enjoyable for children to consume. Regular use can help prevent severe vitamin D deficiency and promote healthy growth.

Indications

- Helps improve calcium and phosphorus absorption.
- Helps immune system health.

How to use

- Take 1 drop daily orally or as directed by your doctor.

Point

- Gluten-free
- Free from artificial color, odor, and flavor.

D3 1000 drops BSK®

Severe vitamin D deficiency leads to poor calcium and phosphorus absorption, rendering calcium supplements ineffective in osteoporosis treatment. In children, severe vitamin D3 deficiency causes rickets, while in adults, it leads to osteomalacia. Low levels of vitamin D in adults and the elderly are associated with a higher risk of fractures and osteoporosis.

D3 1000 drops BSK® is a 5 mL oral dropper solution suitable for daily vitamin D3 supplementation and deficiency correction.

Indications

- Enhances calcium and phosphorus absorption.
- Supports immune system health.
- Helps prevent and treat vitamin D deficiency.

How to use

- 1 drop daily after meals, or as directed by a physician.

Point

- Designed for daily use without the need for a dropper.
- Free from artificial additives, making it suitable for sensitive individuals.

Colief

Bloating and abdominal pain are common in infants, leading to discomfort and crying. Taking simethicone before meals can help with prevention of flatulence and bloating. Dill and fennel extract also help relieve heartburn.

Colief BSK® is produced as 30 ml oral drop containing 40 mg Simethicone, 0.0007 ml fennel oil and 0.005 ml dill oil per ml with mint flavor.

Indications

- Relief of bloating and the gas trapped inside the gastrointestinal tract
- Relief of abdominal pain and infantile colic

How to use

- According to physician's order or 15 minutes before meal according to the table below:

Age	Recommended dose
Below 6 months	0.5 ml , 4 times daily
6-12 months	0.75 ml , 4 times daily
Older than 12 months	1 ml , 4 times daily

Point

- The amount of mint in this product is very low and it is only to have the desired taste.

Vitargin®

L-arginine is an amino acid that can relieve growth-related problems in children by stimulating the secretion of growth hormone. Lysine is considered as an essential amino acid, and it cannot be synthesized by the body. It is required for collagen synthesis and thus may be important to bone health. Zinc is effective in increasing the average weight and height of infants and improving motor development.

Vitargin® is produced as 200 ml oral syrup containing 500 mg L-Arginine, 100 mg Lysine, 1 mg Vitamin B1, 5 mg Vitamin B3, 600 IU Vitamin D3, 1.2 mcg Vitamin B12, 2 mg Vitamin B6, 5 mg Zinc gluconate and 600 IU Vitamin A per 5 ml with Pineapple flavour. It is also gluten free.

Indications

- Helping to stimulate the growth hormone secretion
- Boosting the immune system
- Improving appetite

How to use

- Children 3 to 7 years old take 5 ml daily after meals or as directed by the doctor.
- Children older than 7 years old take 10 ml daily after meals or as directed by the doctor.
- Children under 3 years old take as directed by the doctor.

Point

-

Neurobeen kids®

B vitamins are water-soluble vitamins that play a vital role in cellular metabolism and proper nervous system function. These vitamins are essential for energy production from food and the formation of new blood cells.

Neurobeen kids® is a 200-ml oral syrup with peach flavor. With a comprehensive blend of all essential B vitamins, Neurobeen kids® is specially formulated to boost appetite and support daily energy needs for children. Of note, this product is gluten-free and sugar-free.

Indications

- Increase in appetite
- Boosts body energy levels
- Enhance immune system
- Provides essential daily B vitamins

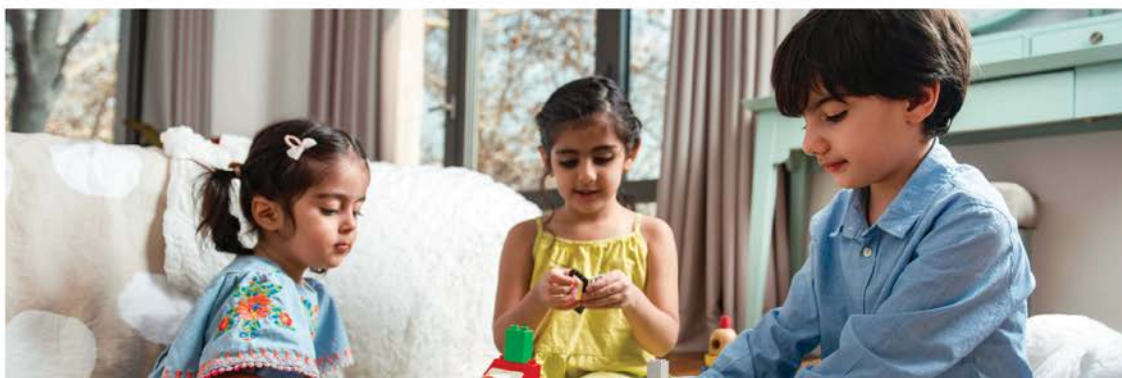

How to use

Administrate as directed by your physician, or:

- Children aged 1 to 8 years: 5 ml daily
- Children aged 9 years and older: 10 ml daily

Point

- This product is gluten-free, without artificial color or alcohol, with peach flavored.

Immune Zinc Royal

Royal Jelly (RJ) is a powerful natural remedy known for its rich nutritional composition, including proteins, vitamins, minerals, and bioactive compounds that offer a wide range of therapeutic benefits. It supports the immune system by modulating immune cell production, aids in managing chronic diarrhea and constipation, while zinc supplementation effectively addresses acute diarrhea and zinc deficiency, which can impair growth, immunity, and cognitive function. Vitamin C supplementation, along with zinc, plays a crucial role in asthma management, particularly for individuals with deficiencies in these nutrients.

Immune Zinc Royal BSK® contains 60 Chewable tablets. Each tablet contains vitamin C (100 mg), Zinc as citrate (5 mg), royal jelly (75 mg). Its rich nutritional composition, comprising proteins, vitamins, minerals, and unique bioactive compounds, underscores its therapeutic potential. The enduring fascination with RJ in traditional medicine highlights its legacy as a natural remedy with profound implications for human health and wellness.

Indications

- Supply vitamin C and Zinc
- Immunity booster
- General health

How to use

- Children over 3 years: 2 tablets daily or as directed by the doctor.

Point

- This product is chewable tablets, gluten-free, sugar-free with pleasant flavor.
- Avoid using this product if you have a history of asthma or an allergy to bee stings.

Sport & Health

L-CARNITINE BSK®

Carnitine is an amino acid-derived compound, known to aid metabolism and produce energy from food. This substance is produced naturally in the body and can have a wide range of effects on metabolism and energy supply in the body. L-Carnitine can also increase the motility and sperm count in men and so improve fertility.

L-Carnitine BSK® is produced as 10 ml single-dose oral liquid vials with different doses of 1000 mg, 2000 mg and 3000 mg with pleasant flavor.

Indications

- Treatment of primary or secondary L-Carnitine deficiency
- Improving metabolism and fat oxidation
- Improving physical performance and endurance during exercise.

How to use

- According to physician's order or 1 vial daily.
- This product can be consumed alone or with drinks and food.

Point

- For best results in athletes, dissolve in a drink half an hour before physical activity, preferably with a carbohydrate meal.

L-ARGININE BSK®

L-arginine is an amino acid that can improve growth, healing and tissue repair through its role in protein synthesis. Also, this amino acid can be effective in sexual problems in men and improves their sexual potency by increasing blood supply to the affected organs and tissues.

L-arginine BSK® is produced as 10 ml single-dose oral liquid vials with different doses of 1000 mg and 2000 mg L-Arginine with pleasant flavor.

Indications

- Improvement of cardiovascular performance
- Helping to stimulate the growth hormone
- Helping to reduce blood pressure
- Athletic performance and endurance enhancement
- Improvement of sexual function
- Decreasing recovery time after surgery

How to use

- According to physician's order or 1 vial daily.
- This product can be consumed alone or with drinks and food.

Point

- For best results in athletes, dissolve in a drink half an hour before physical activity preferably with a carbohydrate meal.

L-ARGININE 1000 BSK®

Indications

Arginine is an amino acid that influences growth and the synthesis of proteins essential for wound and tissue repair. By stimulating the secretion of growth hormone, arginine can help address growth-related issues in children. Additionally, this amino acid improves blood flow to organs and tissues, contributing to enhanced sexual performance and vitality in men.

L-Arginine BSK® is available as an oral tablet containing 1 gram of L-arginine. Each bottle contains 30 tablets. This product plays a role in stimulating growth hormone secretion, promoting recovery and reducing convalescence after surgery, and enhancing athletic performance.

- Improving growth by stimulating growth hormone secretion
- Enhancing athletic performance and increasing endurance
- Supporting improved sexual performance in men
- Contributing to the reduction of blood pressure
- Assisting in recovery and reducing convalescence duration after surgery

How to use

- Take 1 to 3 tablets daily with a glass of water between meals, or as directed by your physician.

Point

- Avoid using this product simultaneously with sildenafil or tadalafil, or if you have a history of heart attack.

L-ARGININE BN®

Arginine is an amino acid that influences growth and the synthesis of proteins essential for wound and tissue repair. By stimulating the secretion of growth hormone, arginine can help address growth-related issues in children. Additionally, this amino acid improves blood flow to organs and tissues, contributing to enhanced sexual performance and vitality in men.

L-Arginine BN® is available as an oral tablet containing 1 gram of L-arginine. Each bottle contains 90 tablets. This product plays a role in stimulating growth hormone secretion, promoting recovery and reducing convalescence after surgery, and enhancing athletic performance.

Indications

- Improving growth by stimulating growth hormone secretion
- Enhancing athletic performance and increasing endurance
- Supporting improved sexual performance in men
- Contributing to the reduction of blood pressure
- Assisting in recovery and reducing convalescence duration after surgery

How to use

- Take 1 to 3 tablets daily with a glass of water between meals, or as directed by your physician.

Point

- Avoid using this product simultaneously with sildenafil or tadalafil, or if you have a history of heart attack.

L-Carnitine 1000 BSK®

L-Carnitine is a compound derived from the amino acids methionine and lysine that aids in the metabolism and energy production from food. L-Carnitine as a naturally occurring compound, plays a critical role in energy supply and metabolic processes. Additionally, this amino acid significantly enhances male fertility by improving sperm strength, motility, and count, thus boosting reproductive potential.

L-Carnitine BSK® is an oral tablet containing 1 gram of L-Carnitine. Each bottle contains 30 tablets. This formulation effectively enhances fat metabolism and oxidation, improves physical performance and reduces fatigue, and supports male fertility by optimizing sperm quality.

Indications

- Improving fat metabolism and oxidation.
- Enhancing oxygen consumption, physical performance and endurance during workouts.
- Reducing physical and mental fatigue, as well as preventing muscle loss in chronic conditions.
- Preventing primary and secondary L-Carnitine deficiency in vegetarians and people following specific diets.
- Improving male fertility by enhancing sperm quality, motility, and count.
- Supporting the management of hyperthyroidism symptoms, including anxiety, fatigue, and heart palpitations.

How to use

- Take 1 to 3 tablets daily or as directed by your doctor.

Point

- People with hypothyroidism or epilepsy should consult a doctor before administration.

L-Carnitine 1000 BN®

L-Carnitine is a compound derived from the amino acids methionine and lysine that aids in the metabolism and energy production from food. L-Carnitine as a naturally occurring compound, plays a critical role in energy supply and metabolic processes. Additionally, this amino acid significantly enhances male fertility by improving sperm strength, motility, and count, thus boosting reproductive potential.

L-Carnitine BN® is an oral tablet containing 1 gram of L-Carnitine. Each bottle contains 90 tablets. This formulation effectively enhances fat metabolism and oxidation, improves physical performance and reduces fatigue, and supports male fertility by optimizing sperm quality.

Indications

- Improving fat metabolism and oxidation.
- Enhancing oxygen consumption, physical performance and endurance during workouts.
- Reducing physical and mental fatigue, as well as preventing muscle loss in chronic conditions.
- Preventing primary and secondary L-Carnitine deficiency in vegetarians and people following specific diets.
- Improving male fertility by enhancing sperm quality, motility, and count.
- Supporting the management of hyperthyroidism symptoms, including anxiety, fatigue, and heart palpitations.

How to use

- Take 1 to 3 tablets daily or as directed by your doctor.

Point

- People with hypothyroidism or epilepsy should consult a doctor before administration.

L-CARNITINE PLUS BSK®

Carnitine and arginine increase fat and carbohydrate metabolism and generally boost metabolism in the body. They also reduce fatigue, improve endurance and athletic performance.

L-carnitine plus BSK® is produced as 10 ml single-dose oral liquid vials containing 1000 mg L-Carnitine and 1000 mg L-Arginine with pleasant flavor.

Indications

- Improving metabolism and fat oxidation
- Stimulating growth
- Improving physical performance, energy and the ability to do exercises
- Enhancing immune function and helping to heal the wound in recovery period after surgery and diseases

How to use

- According to physician's order or 1 vial daily.
- This product can be consumed alone or with drinks and food.

Point

- For best results in athletes, dissolve in a drink half an hour before physical activity, preferably with a carbohydrate meal.

L-Arginine BSK® liquid sachet

L-Arginine is an amino acid essential for promoting the growth and production of proteins involved in wound and tissue repair. It stimulates growth hormone secretion, addressing growth-related issues in children. Additionally, it improves blood circulation, supporting male sexual health and vitality.

L-Arginine BSK® is a single-dose liquid oral sachet containing 1 gram and 2 gram of arginine. It offers easy use, rapid absorption, quick effectiveness, and a pleasant taste.

Indications

- Enhancing athletic performance and boosting endurance.
- Supporting growth through stimulation of growth hormone secretion.
- Improving male sexual health and vitality.
- Supporting cardiovascular health.

How to use

Take one liquid sachet daily or as directed by your physician.

- The sachet can be consumed directly or mixed into a beverage.
- For improving muscle performance and exercise endurance, consume 30 minutes before workouts, preferably alongside a carbohydrate-rich meal.

Point

- Liquid oral sachets for convenient use, rapid absorption, and quick effectiveness.
- Avoid using this product simultaneously with sildenafil or tadalafil, or if you have a history of heart attack.

L-CARNITINE CAFF BSK®

Caffeine releases dopamine and adrenaline as a result of stimulating brain cells, which makes to improve muscle metabolism, fat oxidation and delays fatigue. Group B vitamins can increase the ability of endurance and physical strength.

L-carnitine caff BSK® is produced as 10 ml single-dose oral liquid vials containing 1000 mg L-Carnitine, 100 mg caffeine, 1.5 mg vitamin B1, 20 mg vitamin B3 and 3 mg vitamin B6.

Indications

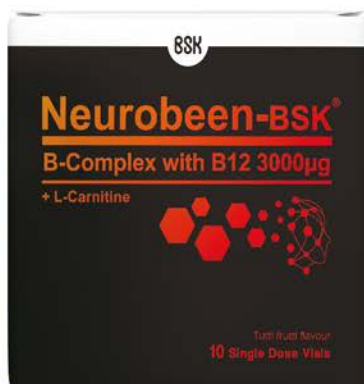

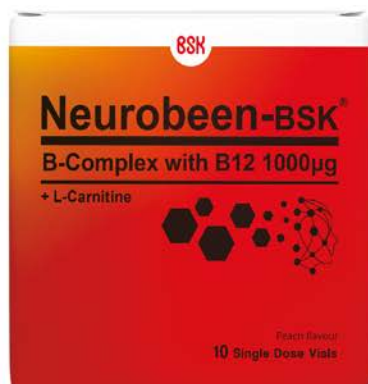

- Enhancing the ability of exercise and improving physical performance
- Reduction of physical and mental fatigue
- Reduction of muscle wasting in chronic diseases
- Stimulation of the heart, respiratory and nervous system

How to use

- According to physician order or 1-2 vial daily.
- This product can be consumed alone or with drinks and food.

Point

- For best results in athletes, dissolve in a drink half an hour before physical activity, preferably with a carbohydrate meal.
- This product should be avoided in children under 12 years old or during pregnancy and lactation.

Neurobeen BSK® Vials

Group B vitamins are water-soluble that play a vital role in the body's metabolism or proper functioning of the nervous system. These vitamins help the body to convert food into energy and promote proper metabolism. It can also play a role in the production of new red blood cells.

Neurobeen BSK® has been produced for the first time as 10 single-dose oral vials containing 5 mg vitamin B1, 7 mg vitamin B2, 25 mg vitamin B3, 10 mg vitamin B6, 1000 mcg vitamin B12, 300 mcg biotin (B7) and 100 mg L-Carnitine with pleasant peach flavour for easy use. Also, this product is designed to 3000 mcg vitamin B12 with pleasant tutti-frutti flavor.

Indications

- Helping to metabolize protein, fat and carbohydrate
- Helping to provide energy by the body
- Helping to function the nervous system

How to use

- According to physician's order or 1 vial daily.

Point

- For best results in athletes, dissolve in a drink half an hour before physical activity, preferably with a carbohydrate meal.

Neurobeen BSK® syrup

B-group vitamins are water-soluble vitamins essential for cell metabolism and proper nervous system function. They help convert food into energy, support metabolism, and contribute to the production of new blood cells.

Neurobeen BSK® is a 130 mL oral B-complex liquid syrup with a delightful peach flavor. Each 10 mL contains 1000 mcg of vitamin B12, 100 mg of L-carnitine, 300 mcg of biotin, 5 mg of vitamin B1, 7 mg of vitamin B2, 25 mg of vitamin B3, and 10 mg of vitamin B6.

Indications

- Supporting protein, fat, and carbohydrate metabolism.
- Aiding in energy production for the body.
- Contributing to the proper functioning of the nervous system.

How to use

- Take 10 ml daily (two teaspoons) or as directed by your physician.
- For enhancing exercise performance and improving physical ability, consume up to half an hour before workouts.

Point

This gluten-free, sugar-free formula offers:

- Easy consumption, rapid absorption, and quick effectiveness.
- A pleasant taste, making it enjoyable to use daily.

Neurobeen BSK® Shots

B-group vitamins are water-soluble vitamins essential for cell metabolism and proper nervous system function. They help convert food into energy, support metabolism, and contribute to the production of new blood cells.

Neurobeen Shots® is a B-complex supplement in a convenient single-dose liquid shot with a delicious peach flavor. Each 10 mL shot contains 1000 mcg Vitamin B12, 100 mg L-Carnitine, 300 mcg Biotin, 5 mg Vitamin B1, 7 mg Vitamin B2, 25 mg Vitamin B3, and 10 mg Vitamin B6. It is ideal for boosting metabolism and providing daily energy needs.

Indications

- Supporting protein, fat, and carbohydrate metabolism.
- Aiding in energy production for the body.
- Contributing to the proper functioning of the nervous system.

How to use

- Take one shot daily or as directed by your physician.
- For enhancing exercise performance and improving physical ability, consume up to half an hour before workouts.

Point

This gluten-free, sugar-free formula offers:

- Easy consumption, rapid absorption, and quick effectiveness.
- A pleasant taste, making it enjoyable to use daily.

AMINO CAFFEINE®

Branched-chain amino acids, or BCAAs, stimulate protein production mainly in skeletal muscle as well as adipose tissue and liver. These amino acids increase the protein concentration, thereby reduce the breakdown of muscle proteins to produce energy during extreme sports. Caffeine also reduces the amount of effort required to perform sports, which ultimately increases the athlete's physical endurance and the time it takes to feel tired during exercise. Thus it increases athletic performance and prevents fatigue.

AminoCaffeine BSK® is produced as 300 oral tablets containing 600 mg BCAAs, 10 mg caffeine and 1 mg vitamin B6.

Indications

- Prevention of muscle wasting in athletes
- Helping to supply branched chain amino acids
- Helping to increase awareness
- Delay in the onset of fatigue

How to use

- 10 tablets daily, 5 tablets one hour before exercise and 5 tablets 30 minute after physical activity.

Point

-

L-Carnitine+B12

Vitamin B12 acts as a co-enzyme in various body functions such as fat and carbohydrate metabolism and protein synthesis. L-Carnitine is naturally produced in the body which plays a crucial role in metabolism and energy production.

L-Carnitine+B12 is produced as granules that readily melt in the mouth. Sachet formulation is easy to use and does not need water which accelerates its absorption and effectiveness as a result. Each 3 gram sachet contains 1000 mg L-Carnitine and 6 mcg vitamin B12 with lemon flavor.

Indications

- Helping with fatty acid metabolism

How to use

- 1-3 sachets daily
- Pour the contents of the sachet completely on the tongue and allow the powder to dissolve in the mouth and then swallow it.

Point

- For best results in athletes, use half an hour before physical activity, preferably with a carbohydrate meal.

Energy Caff

Taurine is often referred to as an amino acid. It is found in high concentrations in the brain, retina, heart, platelets and muscle tissue. It has become a popular supplement among athletes attempting to improve performance. Caffeine improves performance endurance during long-term exercise and vitamin B1 is also an essential coenzyme for carbohydrate metabolism.

Energy Caff® is produced as granules that readily melt in the mouth. Sachets formulation is easy to use and dose not need water which accelerates its absorption and effectiveness. Each 1.5 g sachet contains 75 mg caffeine, 100 mg taurine, 2.2 mg vitamin B1 and 10 mcg vitamin B12 with cola flavor.

Indications

- improving concentration
- delaying fatigue
- increasing the body's energy levels and metabolism

How to use

- 1 sachet daily.
- Pour the contents of the sachet completely on the tongue and allow the powder to dissolve in the mouth and then swallow it.

Point

- To improve muscle function and increase the ability of athletes, it is better to consume half a hour before physical activity, preferably with a meal of carbohydrates and a glass of water.

CAFFEINE PLUS

Taurine and theanine are amino acids that are not produced by the body but play a role in improving recovery, overall health, mental performance, and focus. Caffeine enhances exercise capacity during prolonged workouts (lasting over 90 minutes). B-group vitamins play crucial roles in cell metabolism and the proper functioning of the nervous system, helping the body convert food into energy. Caffeine Plus® contains 200 mg of caffeine, 250 mg of taurine, 75 mg of theanine, and 5 mg of vitamin B6. Each bottle contains 90 oral tablets. This supplement is ideal for boosting energy levels and metabolism, particularly for athletes and individuals experiencing physical and mental fatigue. Caffeine Plus helps restore energy and improve focus effectively.

Indications

- Providing folate and vitamin B12 needed by the body
- Improving anemia caused by folate and vitamin B12 deficiency
- Ensuring the health of the nervous system and mental development of children

How to use

- One tablet half an hour before exercise.
- Depending on caffeine tolerance, up to 2 tablets per day can be used with a 3–4-hour interval.

Point

- This product is gluten-free and sugar-free.

Diabetes & Weight Lose

Cinnamon 7 Plus

Cinnamon is effective in reducing inflammation and improving overall health because of its antioxidant properties. Chromium helps regulate blood sugar levels and reduces cravings, while zinc and B vitamins support the immune system and energy metabolism. The combination of these ingredients creates a unique formulation designed to boost metabolism, regulate and control blood sugar and lipid levels, improve polycystic ovary syndrome (PCOS), and help regulate the menstrual cycle. Cinnamon 7 Plus® is a unique combination for improving glucose metabolism and controlling blood lipids. Each two pills contain 1000 mg of cinnamon powder, 1 mg of Vitamin B1, 1.2 mg of Vitamin B2, 1.2 mg of Vitamin B6, 3 mcg of Vitamin B12, 30 mcg of Chromium, and 5 mg of Zinc (gluconate). Due to the inclusion of cinnamon powder, chromium, and other active ingredients, Cinnamon 7 Plus® is effective in managing diabetes-related issues, PCOS in women, and lipid metabolism disorders.

Indications

- Improving insulin resistance and reducing blood sugar levels
- Supporting proper metabolism of fats and carbohydrates
- Assisting in menstrual cycle regulation and aiding patients with polycystic ovary syndrome (PCOS)
- Providing strong antioxidant and anti-inflammatory effects
- Helping to alleviate daily fatigue

How to use

- Take 1 to 2 tablets daily or as directed by your doctor.
- Consume the tablets with your main meal and plenty of fluids.

Point

- Consumption during pregnancy and breastfeeding is contraindicated.

GREEN COFFEE BSK®

Green coffee extract used in this product is prepared from unroasted Arabic green coffee beans, because the highest amount of chlorogenic acid in coffee beans are found in the raw form. This product also stores fat in the liver and improves the activity of fat-burning hormone adiponectin. It contains chlorogenic acid which can reduce glucose synthesis in the liver and so helps to lower blood sugar.

Green coffee BSK® is produced as 60 oral tablets, containing 400 mg standardized green coffee bean powder with 50% chlorogenic acid and about 2-5% caffeine.

Indications

- Weight loss
- Reducing blood pressure
- Reducing blood sugar
- Antioxidant

How to use

- According to physician's order or 2-3 tablets daily half an hour before meal with a glass of water.

Point

- Use of this product should be avoided in people under 18 years old and pregnant or breast feeding women.

GARCINIA CAMBOGIA BSK®

Garcinia Cambogia fruit has been used in cooking and traditional medicine for centuries as an aid digestion and a natural appetite suppressant. This fruit is rich in hydroxycitric acid, which can inhibit fat production in the body.

Garcinia Cambogia BSK® is produced as 90 oral tablets, containing 500 mg standardized Garcinia Cambogia extract powder with more than 50% hydroxycitric acid (HCA).

Indications

- Helping to reduce appetite
- Lose weight and body fat along with a healthy diet and physical activity

How to use

- According to physician's order or 2-3 tablets daily half an hour before meal with a glass of water.

Point

- Use of this product in people under 18 years old, pregnant and lactating women is not allowed and should be avoided.
- Consumption of this product is not allowed for more than 12 weeks.

Green size®

This product is composed of 6 active ingredients, including Green Coffee, Garcinia Cambogia, Acetyl L-Carnitine, Raspberry, Dehydroepiandrosterone and Chromium Picolinate, which are effective in fat and carbohydrate metabolism, appetite suppression and improvement of insulin function.

Green size® is produced as 3 packages of 30 tablets. Cream-colored tablets contain 400 mg green coffee bean extract, green tablets contains 400 mg Garcinia Cambogia extract powder, 50 mg raspberry ketone and 150 mg acetyl L-Carnitine. The red tablets also contain 250 mg acetyl L-Carnitine, 50 mg Dehydroepiandrosterone and 500 mcg Chromium picolinate.

Indications

- Appetite suppression, weight reduction, and increased fat oxidation.
- Improved body composition by enhancing muscle mass, reducing body fat, and boosting fat and glucose metabolism.
- Enhanced physical performance and exercise capacity.
- Antioxidant effects, cancer prevention, and cardiovascular health support.

How to use

- 1 to 2 packs daily (3 to 6 tablets) before meals with a glass of water.
- The three tablets can be taken together or separately, as directed by a physician.

Point

- Not recommended for individuals under 18, pregnant, or breastfeeding women due to insufficient studies.
- Continuous use beyond three months is not advised.

Gastrointestinal Probiotic

PYLOSHOT®

The pathogen bacterium *Helicobacter pylori* can cause stomach infection. In order to treat this infectious agent, various antibiotics are usually used but this disease may recur and become resistant to antibiotics and chemical treatments.

Pyloshot® is produced as oral capsules, containing 100 mg non-living *Lactobacillus reuteri* and three other probiotic strains called *Lactobacillus acidophilus*, *Lactobacillus casei* and *Bifidobacterium lactis* with bacterial count of more than 10^9 CFU. Also, it includes 50 mg magnesium as magnesium oxide, 50 mg calcium as calcium carbonate and 5 mg zinc as zinc gluconate.

Indications

- Reduction of *Helicobacter pylori* population in high prevalence societies.
- Short-term reduction of *Helicobacter pylori* population in stressful conditions
- Long-term prevention and reduction of *Helicobacter pylori* population in infected adults without clinical symptoms
- Prevention of gastric ulcer

How to use

- According to physician's order or 2 capsules daily for 14 days.

Point

- Leave at least 2 hours between this product and antibiotics

Woman & Pregnancy

Pregbion® 1

The mother's need for nutrients increases during pregnancy for growth and development of the fetus. According to American Pregnancy Association taking iodine and folic acid supplements in the first trimester and before pregnancy is essential and can significantly prevent neurological and cerebral defects.

Pregbion®1 is produced as 30 tablets containing 400 mcg folic acid, 416 mcg L-methyl folate (active form of folic acid), 150 mcg Iodine, 1.2 mg vitamin B1, 1.6 mg vitamin B2, 1.9 mg vitamin B6, 3.5 mcg vitamin B12, 60 mcg biotin, 15 mg niacin, 6 mg pantothenic acid, 13 IU vitamin E and 110 mg vitamin C.

Indications

- Providing mother's daily need of iodine and folic acid during pregnancy
- Providing mother's daily need of vitamin E, vitamin C and group B vitamins during pregnancy

How to use

- According to physician's order or 1 tablet daily started before pregnancy and during the first trimester of pregnancy.

Point

-

Pregbion® 2

Nutrient in lactation has significant and crucial roles, therefore it is necessary to provide the essential materials for growth and also development of the infant. DHA is preferentially incorporated into the rapid developing fetal brain during the last trimester, concentrating in the gray matter and retinal membranes.

Pregbion® 2 is produced as 30 oral capsules and 30 tablets containing 200 mg DHA and 18 IU vitamin E in each capsule and also 200 mcg folic acid, 208 mcg L-methyl folate (active form of folic acid), 150 mcg Iodine, 1.2 mg vitamin B1, 1.6 mg vitamin B2, 1.9 mg vitamin B6, 3.5 mcg vitamin B12, 60 mcg biotin, 15 mg niacin, 6 mg pantothenic acid, 19.5 IU vitamin E and 110 mg vitamin C in each tablet.

Indications

- Improving maternal and fetal health
- Boosting energy level of mother
- Improving brain and visual system development in fetus.
- Preventing birth defects during pregnancy

How to use

- According to physician's order or 1 tablet and 1 capsule daily from 13th weeks of pregnancy and during lactation

Point

-

Liposofer fort®

Iron is the most important mineral among women. Iron liposomal form releases it into the gastrointestinal tract cell via endocyte without causing common side effects of other iron formulations such as nausea, vomiting, cramp and etc. This product contains vitamin B12 and folic acid as the essential ingredients to make healthy red blood cells, white blood cells, and Platelet. Liposofer fort® is produced as 30 capsules containing 30 mg Liposomal Iron, 70 mg vitamin C, 400 mcg Folic Acid and 5 mcg vitamin B12 with Pleasant strawberry flavor.

Indications

- Prevention from Iron deficiency anemia and inducing Hematopoiesis
- Hair loss reduction and fatigue caused by anemia

How to use

- According to physician's order or 1 capsule daily.

Point

- Due to the liposomal form of iron in this product, it does not interfere with other drugs and dairy products.

A romantic couple, a man and a woman, are shown in a close embrace in a park. The man, on the left, has short brown hair and is wearing a light-colored, textured cardigan over a white t-shirt. The woman, on the right, has short blonde hair and is wearing a similar light-colored cardigan with a thick, knitted scarf. They are both smiling and looking at each other. The background is a soft-focus view of trees with bright yellow autumn leaves, suggesting a warm, sunny day. A semi-transparent dark grey banner is positioned across the lower half of the image, containing the text "Bone & Joint Health" in a bold, white, sans-serif font.

Bone & Joint Health

AvoSoy®

Avocado and Soybean oil extract can play a role in joint inflammation and reduce its severity. These also prevent from structural damage in the joints which can be effective in reducing joint pains. AvoSoy® is produced as 30 capsules containing 300 mg non-saponified extract of avocado and soybean oil (ASU), with a special technology of liquid-filled capsules called LIQcaps® which increases absorption and effectiveness.

Indications

- Osteoarthritis and other degenerative joint diseases
- Reducing pain, inflammation and stiffness of joint
- Reducing progression of joint diseases
- Improving normal joint function and reducing dependence on analgesics

How to use

- According to physician's order or 1 capsule daily.

Point

- Consumption of this product may causes allergy in people who are allergic to latex.

AVOSOURCE®

Avocado and soybean oil extracts are clinically proven to help reduce joint inflammation, alleviate pain, and slow cartilage degradation. Additionally, ginger extract can relieve pain in patients with osteoarthritis.

Avosource® is a natural product that contains avocado, soybean, and ginger extracts, and vitamin D. The synergistic effect of these ingredients enhances the overall efficacy of the product. This natural formulation helps reduce inflammation, relieve pain, and support joint function, promoting a better quality of life for individuals with joint conditions.

Indications

- Relieves joint pain and inflammation.
- slows the progression of joint diseases and cartilage degradation.
- Improves pain associated with osteoarthritis and other joint conditions.
- Enhances natural joint function and reduces dependence on painkillers.

How to use

- Take one tablet daily with food or as directed by your doctor.

Point

- Gluten-free.
- Individuals with a latex allergy should avoid this product due to the potential for a reaction to oral avocado consumption.

Magnetra®

Magnesium is one of the most abundant minerals in the body, which plays a vital role in the health of the body. Heart, nerves, tissues, bones and muscles need magnesium. Magnesium is also involved in the development and maintenance of bone and the metabolism of carbohydrate, protein and fat. Magnetra® is produced as granules that readily melt in the mouth. Sachet formulation is easy to use and does not need water which accelerates its absorption and effectiveness. Each 1g sachet contains 300 mg elemental magnesium as magnesium oxide with lemon flavor.

Indications

- Reduction of muscle pain and cramps
- Reduction of the severity and frequency of migraine headaches
- Helping to control diabetes and high blood cholesterol
- Relieving dyspepsia, reflux and constipation
- Relieving premenstrual syndrome symptoms

How to use

- According to physician's order or 1 sachet daily after meal
- Pour the contents of the sachet completely on the tongue and allow the powder to dissolve in the mouth and then swallow it.

Point

-

Magnetra Fort®

Magnesium is one of the most abundant minerals in the body, playing a vital role in overall health. The heart, nervous system, tissues, bones, and muscles all require magnesium for proper function. It is involved in carbohydrate, protein, and fat metabolism, bone and tooth health, tissue formation, ion transport across cell membranes, maintaining electrical potentials, nerve-muscle signaling, and optimal muscle function.

Magnetra Fort® comes in a 10-shot pack with a mojito flavor, containing 400 mg magnesium citrate-malate and 2.4 mg vitamin B6. Its liquid formulation allows for easy consumption without water while ensuring faster absorption and effectiveness.

Indications

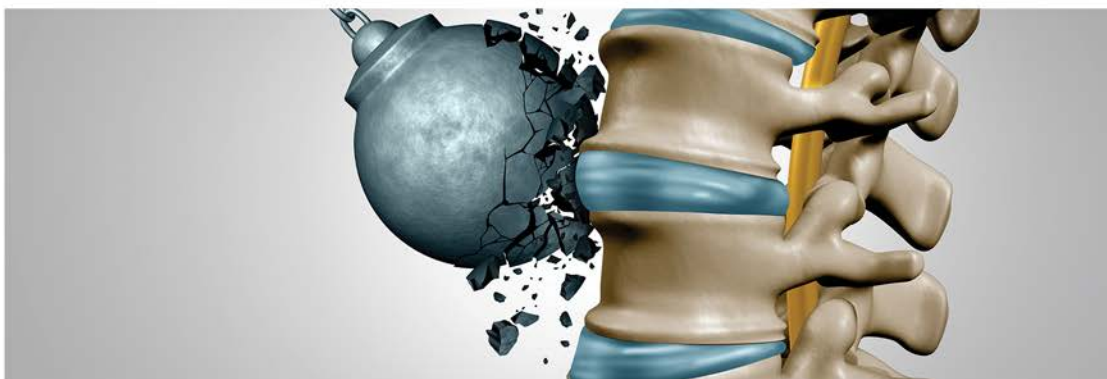

- Supports neuromuscular system health.
- Helps relieve muscle spasms.
- Aids in vitamin B6 supplementation.

How to use

- One shot daily, or as directed by a physician.

Point

- Sugar-free and gluten-free with a refreshing mojito flavor.
- Contains magnesium in citrate-malate form for enhanced absorption.

Calcimove®

Calcium is essential for the integration of nervous and muscular system function, neurotransmission, muscle contraction, normal heart function, vasoconstriction and dilation, permeability of cell membranes and capillaries, enzymatic functions, kidney function and blood coagulation. Besides, Mg, Ca, Zn and vitamin D3 are the essential ingredients to bone health.

Calcimove® is produced as 30 oral tablets containing 400 mg calcium, 100 mg magnesium, 5 mg zinc and 400 IU vitamin D3.

Indications

- Helps the bone health

How to use

- According to physician's order or 2 tablets daily

Point

- It's best to avoid coffee and tea about 2 hours of taking calcimove®.

Improve Immunity

Immune Zinc BSK®

Vitamin C, plays a key role in proper functioning of cells involved in the immune system, in addition to being an antioxidant and protective element against free radicals. Zinc is also a necessary factor involved in many biological processes in the body. These two micronutrients are interdependent to protect the immune system and maintain the health of the body.

Immune Zinc BSK® is produced as granules that readily melt in the mouth. Sachet formulation is easy to use and does not need water which accelerates its absorption and effectiveness. Each 1g sachet contains 300 mg vitamin C and 10 mg elemental zinc as zinc sulfate with lemon flavor.

Indications

- improvement of wound healing
- Boosting the Immune system function
- Prevention and control of the common cold incidence

How to use

- According to physician's order or 1 sachet daily after meal
- Pour the contents of the sachet completely on the tongue and allow the powder to dissolve in the mouth and then swallow it.

Point

-

Magic C BSK®

Vitamin C is commonly found in citrus fruits and many vegetables which plays a key role in proper functioning of cells involved in the immune system. Vitamin C has a critical role in collagen synthesis, in addition to being an antioxidant and protective element against free radicals.

Magic C BSK® is produced as granules that readily melt in the mouth. Sachet formulation is easy to use and does not need water which accelerates its absorption and effectiveness. Each 1g sachet contains 1000 mg vitamin C with pineapple, apple and punch flavors.

Indications

- Helping to improve the immune system
- Helping to repair the skin

How to use

- According to physician's order or 1 sachet daily after meal
- Pour the contents of the sachet completely on the tongue and allow the powder to dissolve in the mouth and then swallow it.

Point

-

Q10 BSK®

Coenzyme Q10 decreases with age, thus it has antioxidant properties which enhances the immune system. It also strengthens the body's immune system and prevents cancer and cardiovascular diseases. Q10 BSK® is produced as 60 capsules containing 100 mg co-enzyme Q10.

Indications

- Improving cardiovascular diseases and neurology such as Alzheimer
- Prevention of cancer and improving immune system
- Boosting energy and improving tolerance
- Enhancing general health
- Boosting male fertility and increasing sperm count

How to use

- According to physician's order or 1-3 tablets daily after meal.

Point

-

Eye Health

Perfect Vision 3 BSK®

Carotenoids are natural compounds that could have beneficial effects on eye's health. Lutein and Zeaxanthin are several carotenoid-derived compounds that protect the eye from harmful light waves and prevent blurred vision. Vitamin E, vitamin C, zinc and fish oil can improve the health of the eyes with antioxidant effects.

PerfectVision3 BSK® is produced with the technology of liquid- filled capsules called LIQcaps which increases absorption and effectiveness. Each capsule contains 10 mg lutein, 2 mg zeaxanthin, 30 mg vitamin E, 180 mg vitamin C, 15 mg zinc and 1016 mg fish oil which contain 600 mg omega-3 including 360 mg DHA.

Indications

- Helping the health of eyes and protective role in the prevention of cataract
- Improving dry eye syndrome and increases tear secretion
- Improving and prevents blurred vision, decreased vision and eye inflammation

How to use

- According to physician's or 2 capsules daily.
- For better absorption take after meal.

Point

-

Hair & Skin

Biotin

Biotin or vitamin B7 is mostly found in foods such as eggs and milk. Biotin deficiency causes hair thinning and rashes on the skin. This vitamin plays a key role in the body and helping to maintain healthy skin, nerves, gastrointestinal tract and metabolism.

Biotin is produced as 60 fast-dissolving oral tablets in two doses of 1000 mcg and 2500 mcg with peach and blueberry flavor.

Indications

- Helps the health of skin, nail and hair
- Hairloss reduction

How to use

- According to physician's order or 1 tablet daily
- For best results, allow the tablet to dissolve completely in the mouth before swallowing and does not need water.

Point

-

Zinc fort BSK®

Zinc is an essential mineral in almost all cells and stimulates the activity of approximately 100 enzymes. Zinc deficiency may be associated with an increased risk of infection. As treatment of cold, zinc may interfere with the isolation or adhesion of rhinovirus and may protect the plasma membrane from microbial toxins.

Zinc Fort BSK® is produced as 60 tablets containing 40 mg elemental zinc as gluconate.

Indications

- Boosting immune system
- Hair growth
- Improvement of depression symptoms

How to use

- According to physician's order or 1 tablet daily with a glass of water and meal.

Point

-

Acnutan BSK®

Isotretinoin, is a vitamin A derivative which is called retinoid. This drug reduces both the size of the sebaceous glands and the secretion of sebum or skin fat, result in reduction of skin inflammation. Acnutan BSK® is produced as 30 capsules containing 20mg Isotretinoin with the technology of liquid-filled capsules called LIQcaps® which increases absorption and effectiveness.

Indications

- Treatment of severe acne (Cystic or nodular acne)
- Reducing skin sebum production
- Reducing skin inflammation

How to use

- According to physician's order

Point

- Isotretinoin can cause a serious fetal damage and therefore should be avoided in pregnant woman who may become pregnant during treatment.

Collagen (5 g) Plus B & Zinc

Collagen is a major structural protein found in the skin, bones, cartilage, tendons, and connective tissues. It plays a key role in maintaining skin firmness, elasticity, and hydration. As collagen production declines with age, it leads to wrinkles and skin sagging.

Collagen (5 g) Plus B & Zinc contains 5000mg Marine hydrolyzed collagen, B vitamins (including 5mg thiamine, 10mg niacin, 5mg pyridoxine, 500mcg biotin, 20mcg cyanocobalamin), and 2.5mg zinc as citrate, offering multiple benefits, Enhances skin hydration and moisture retention, Reduces the appearance of wrinkles and fine lines, Prevents premature skin aging, Type I and III fish collagen.

Indications

- Supports skin, hair, and nail health.
- Promotes bone and joint strength.
- Provides essential B vitamins.

How to use

- One shot daily, or as directed by a physician.

Point

- Free from soy, fat, lactose, sugar, and gluten.
- Contains hydrolyzed collagen (higher absorption) derived from fish.

Sleep Health

Sleep Med

Melatonin is a hormone secreted by the pineal gland of the brain in response to dim light, and is responsible for regulating the day-night cycle or the body's sleep-wake cycle. Sleepmed BSK® is produced as 60 fast-dissolving oral tablets in two doses of 3 mg and 6 mg melatonin with peach and blueberry flavor.

Indications

- Improving jet lag
- Helping to fall asleep faster and stay asleep longer

How to use

- According to physician's order or 1 tablet daily
- Take 1 tablet 20 minutes before bedtime.
- For best results, allow the tablet to dissolve completely in the mouth before swallowing and dose not need water.
